RELEVANT EXPERIENCE

Senior System Test Technician | ZT Systems | Georgetown, TX — August 2025 - Present

- Train and mentor new technicians on server testing procedures, troubleshooting methodology, and test environment operations, reducing ramp-up time
- Serve as shift specialist, resolving escalated hardware and software issues across 8+ SKUs and keeping 2 - 10 servers/racks per shift moving through test
- Independently designed and built an internal training website (HTML, CSS, JavaScript) now used by 10+ employees to learn server troubleshooting fundamentals and multi-SKU test environments
- Perform server- and rack-level validation, including BSL verification, functional, performance, and reliability testing on CPUs, memory, storage, NICs, and motherboards
- Run stress, load, and long-duration tests using Linux and Windows CLI tools, then isolate failing components, replace hardware, and retest to confirm full functionality
- Communicate findings to cross-functional teams to resolve issues faster

Machine Operator | NXP | Austin, TX — February 2025 - August 2025

- Handled and transported semiconductor wafers in a high-precision environment; performed tool quality checks and escalated issues to minimise downtime

Home Health Aide | NY — July 2023 - January 2025

- Monitored vital signs and medications for the elderly, maintained accurate records, communicated with care teams, and ensured a safe, hygienic environment

Fellow | CUNY Tech Prep | NY — July 2023 - May 2024

- Completed intensive data science training in Python 3, Jupyter Notebooks, Pandas, NumPy, Scikit-learn, and SQL
- Built hands-on experience in exploratory data analysis, feature engineering, statistical modelling, data visualisation, and machine learning

CERTIFICATES

- CUNY Tech Prep Data Science Certificate — June 2024

PROJECTS

Deepfake Hunter — September 2023 - January 2024

- Collaborated with a team of 2 to develop a TensorFlow model to detect fake audio across 200K+ files, using Librosa for feature extraction and Python for automated data pipelines; trained with Google Colab Pro GPUs and deployed a Streamlit web app for real-time audio authentication.

SKILLS

Programming Languages: Python, Markdown, HTML, SQL, CSS
Hardware & Systems: Server hardware validation, BSL verification, stress/load/long-duration testing, fault isolation, system diagnostics, OS installation, Linux CLI, Windows CLI
Technologies: Visual Studio Code, Git/GitHub, Microsoft Word, Microsoft Excel, Google Sheets, Google Slides, Jupyter Notebook, Linux

EDUCATION

York College, The City University of New York (CUNY) | Jamaica, NY
Bachelor of Science in Computer Science — December 2023
